Listen

CSC 240 Schedule — Fall 2026

Monday, August 17 – Wednesday, December 9. **Everything is due Sunday at 11:59 PM** unless the row says otherwise. Discussions have a Thursday initial-post deadline. **Late work is not accepted.**

There is no midterm exam in this section. Units 1–4 are assessed by Major Oral Inquiry 1 (45) and Units 5–8 by Major Oral Inquiry 2 (45). A **cumulative written final** (50, Honorlock proctored) runs Dec 7–9 — every section of CSC 240 takes the same one.

Wk	Dates	Unit	Focus	Due Sunday 11:59 PM
1	Aug 17–Aug 23	1	Program design, correctness, Big-O	• Orientation Quiz (5) • CS Code of Conduct Quiz (5) • Lab 1: Tic-Tac-Toe (20)
2	Aug 24–Aug 30	1	Operator overloading; loop invariants	• Lab 2: FractionType (40) • AI Transcript 1 (10) • Discussion 1 — post Thu / reply Sun (10)
3	Aug 31–Sep 6	2	Linked lists; the array-vs-linked comparison	• Lab 3: Print, ComparedTo, SplitLists (40) • Mini Oral 1 — Lab 3 (10)
4	Sep 7–Sep 13	2	Array-based lists; dynamic growth	• Lab 4: DeleteItem and ShiftRight (20) • Lab 5: Unbounded SortedType (40) • AI Transcript 2 (10) • Mini Oral 2 — Lab 5 (10)
5	Sep 14–Sep 20	3	Stacks: nodes, exceptions, friends	• Lab 6: StackType ReplaceItem and Identical (20)
6	Sep 21–Sep 27	3	Circular queues; Rule of Three	• Lab 8: Circular LinkedQueueType (50) • AI Transcript 3 (10) • Mini Oral 3 — Lab 8 (10)
7	Sep 28–Oct 4	4	Templates, iterators, generic programming	• Lab 9: LinkedQueueType Iterator (50) • AI Transcript 4 (10) • Discussion 2 — post Thu / reply Sun (10)

8	Oct 5–Oct 11	4	Review and preparation for Major Oral 1	• *Nothing due. Use this week to review Units 1–4 and prepare.*
9	Oct 12–Oct 18	5	Major Oral Inquiry 1; recursion begins	• **Major Oral Inquiry 1, Oct 12–18 (45)** — live, 30 minutes, book early • Lab 7: Recursive StackSum and PowerStack (20)
10	Oct 19–Oct 25	5	Tree recursion; memoization; Newton's method	• Lab 10: Count Paths and Newton's Method (50) • AI Transcript 5 (10) • Mini Oral 4 — Lab 10 (10)
11	Oct 26–Nov 1	6	Binary search trees; balance	• Lab 11: TreeType Ancestors (50) • AI Transcript 6 (10) • Mini Oral 5 — Lab 11 (10) • Discussion 3 — post Thu / reply Sun (10)
12	Nov 2–Nov 8	7	Heaps and priority queues; Group Lab begins	• Lab 12: Job Scheduler (30) • **Group Lab Proposal** (ungraded, required) • Group Log entry 1
13	Nov 9–Nov 15	7	Hashing and collision analysis	• Lab 13: Hashing Strings (30) • Mini Oral 6 — Lab 13 (10) • Group Log entry 2
14	Nov 16–Nov 22	7	Sorting; parallelism and threads	• Lab 14: Parallel Merge Sort (50) • AI Transcript 7 (10) • Group AI Learning Transcript (5) • Group Log entry 3
15	Nov 23–Nov 29	8	Graphs; Floyd's all-pairs shortest paths	• Lab 15: Floyd's All-Pairs (50) • AI Transcript 8 (10) • Discussion 4 — post Thu / reply Sun (10) • **Design document** due Sun Nov 29 — defended live, not separately graded • Group Log entry 4 + Group Log entry 5 • Group Lab Final (40)
16	Nov 30–Dec 6	8	Defense, group finals, and close	• **Major Oral Inquiry 2, Dec 1–4 (45)** — Units 5–8, Group Lab, design defense

• **Final Exam, Dec 4–9 (50)** — cumulative, written, Honorlock proctored

The five dates that are not flexible

- **Major Oral Inquiry 1:** Oct 12–18, worth 45 points. Booking opens two weeks prior.
- **Group Lab Proposal:** Sun Nov 8. Ungraded but required before the Group Log begins.
- **Design document:** Sun Nov 29, and at least 24 hours before your Major Oral 2 session.
- **Major Oral Inquiry 2:** Dec 1–4, worth 45 points. Booking opens Nov 17. Twelve students share a limited number of slots.
- **Final Exam:** Dec 4–9, worth 50 points, Honorlock proctored. Same window as Major Oral 2 — book the oral early in the week so the two do not collide, and test your Honorlock setup in November.

Week 4 is the only double-lab week — Labs 4 and 5, both array-based and closely related. Week 8 is deliberately empty so you can prepare for Major Oral 1. Weeks 11 and 15 are the heaviest. If you are going to get ahead anywhere, get ahead before week 11.
